Table 1 – Data recorded in this table should include all of the materials recycled by your company in 2017 along with the processor/recycler/broker used for each material. Please estimate the quantities of **each type** of material recycled in tons. **The data in the recycled column is used to calculate the District’s progress in meeting state and local recycling goals.** For data conversions assume the following: 2000 pounds = 1 ton and 3 cubic yards = 1 ton.

¹ The District realizes that industrial businesses may recycle cardboard but may not have actual weights of the cardboard based on the style of service provided (dumpster service). The District has provided the following table to document the amount of cardboard recycled annually. Simply fill in the size of your dumpster (2, 4, 6, 8 or 10 cubic yard), how full it is when picked up on average (as a percentage) and the number of times the dumpster is emptied each week. Then use the formula in the table below to calculate your annual tonnage of cardboard. An example is given to assist you in the calculation. If you have additional dumpsters, simply perform the same exercise for each separate dumpster. The total tons recycled can then be transferred to the cardboard total in Table 1.

Table 2 – Recycled Cardboard Calculator

Dumpster	Size of Dumpster (cubic Yards) (a)	Percentage Full When Picked Up (b)	No of Pickups per Week (c)	Estimated Cardboard Recycled (Tons) (a) x (b) x (c) x 52 / 20
<i>Example</i>	<i>6 cubic yards</i>	<i>80% full</i>	<i>1 time/week</i>	<i>(6 x 0.80 x 1 x 52 / 20) = 12.48 tons</i>
